Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The rejection of Claim 1 was discussed. Applicant states using the Oprescu filter with the Ruha PWM renders the combination inoperable. Further consideration will by the Examiner will be required to confirm this. Applicant also wanted to know how to make claims 82 and 83 more like previously indicated allowable claim 74. Examiner suggested combining claims 82 and 83 and adding the feedback limitation. However, Examiner indicated that it was not possible to determine allowability at the current time. Further search and or consideration would be required for all claims..
